Individual Contributions:

Ahmad- installed and get use to the CANalyzer software environment and VN1630 CAN
interface. This will be used to test the coherent data received from the CAN bus and the data that
will be send through the microcontroller. Did some part in presentation slides.

Alec - Worked on getting slides for presentation. Made some updates to the Design Document. Included pictures and more specific hardware specifications. Received Hardware. Set-up meeting with March Senior design group for HW2. Set up a meeting for learning about the CAN protocol with the AG department.

John - Worked on decoding the encoded iop generated files. As well as reseraching and deciding on which XML Parser to use. Decisions were based on VTD, XPATH, and Androids XML Pull Parser of which I chose the latter.
